PREFACE

The technical literature on museum work is more extensive than is usually realized, and because of this it has been felt that a bibliography which would act as a key to the contents of books, periodicals, and other publications on museums, would fill a definite need. The present compilation is intended primarily as a means of locating material on the conduct of museum work, from the planning of new museums to the carrying on of the highly specialized work of a large institution. Secondarily it offers a means of locating illustrations of buildings and their floor plans and, as a result, includes many articles descriptive of individual museums and their collections as a whole.

The bibliography forms a general index to the three most important serials on museum work, only one of which had been so treated before. While the greater portion of the material listed was published in the United States, much effort has also been spent on the listing of the publications of Great Britain, France, and Germany, and, to a lesser degree, the literature from other parts of the world. Many very short articles on South American museums have been included, so that the names of these museums, at least, might appear. A heading *History of Museums and Museum Movement* has been included and under it have been gathered those articles which seemed appropriate.

Not usually listed are references to the following types of museum literature: annual reports, catalogues of exhibitions, publications descriptive of or based on subject matter, i.e., science, art, and history; news stories, and articles of a purely popular nature. Certain exceptions occur, chiefly where important descriptions of museum methods are contained in annual reports or scientific monographs.

S8/59

Beside the usual entries under title and author, the articles have been grouped under nearly four hundred subject headings. These headings,

which are scattered through the bibliography, have been collected for ready use. Reference to this supplementary list will assist the user in locating a subject.

Two examples will show the methods of listing. The title *Method of Mounting Aquatic Animals in Relation to Their Natural Environment* would be found in the following places: *Method, etc.* (this being the first significant word), *Groups, Preparation, Accessories,* and *Habitat Groups.* Further cross-references, which the article itself might suggest, are: *Cases, Collecting, Lighting,* and *Backgrounds.* The title *Rebuilding a Wing of the National Museum to Secure Adequate Lighting for the Turner Collection* would be listed as follows: under *Rebuilding, etc.* (this being the first significant word), *London* (the location of the museum), *National Museums, Architecture, Lighting, Paintings,* and *Installation.*

SUBJECT HEADINGS

Articles have been grouped under one or more of the following subject headings in addition to being listed under title and author.

LIST OF ABBREVIATIONS

Following are the principal abbreviations used in the Bibliography, including the publishing addresses of certain periodicals, the names of which do not form a positive means of identification.

A.A.M. The American Association of Museums.

A.M.N.H. American Museum of Natural History, New York.

All the Arts. Periodical published in Detroit, Michigan.

American Magazine of Art. Published by The American Federation of Arts, Washington, D. C.

American Museum Journal. Published by The American Museum of Natural History, New York (Now *Natural History*).

Art and Progress. Published by The American Federation of Arts, Washington, D. C.

Arts and Decoration. Published by Judd Magazines, Inc., New York, N. Y.

Australian Museum Magazine. Published by the Australian Museum, College Street, Sydney, Australia.

Bull. M. F. A., Boston. Bulletin of the Museum of Fine Arts, Boston, Mass.

Bull. M.M.A. Bulletin of The Metropolitan Museum of Art, New York.

Geological Magazine. Published at 32 Old Bond Street, London.

Mouseion. Bulletin of the Office Internationale des Musees, 2 Rue de Montpensier, Paris.

Musea. Published by the Museum d'Histoire Naturelle, Le Havre, France.

Museum, The. Newark Museum Association, Newark, New Jersey.

Museum Journal. Published by the Museum of the University of Pennsylvania, Philadelphia, Pennsylvania.

Museum News. Published by The Toledo Museum of Art, Toledo, Ohio.

Museum News, The. Published by The American Association of Museums, Washington, D. C.

Museum Work. Published by The American Association of Museums, Washington, D. C.

Museums Journal. Published by The Museums Association, Great Britain.

Museumskunde. Published by Georg Reimer, Berlin.

Nat. Sci. Natural Science.

Natural History. Published by The American Museum of Natural History, New York.

Nature. Published by Macmillan & Co., Ltd., London.

Pop. Sci. Mon. Popular Science Monthly.

Proc. A.A.M. Proceedings The American Association of Museums.

Sci. Amer. Scientific American.

South Eastern Naturalist. Published by East Kent Scientific Society, Canterbury, England.

Totem Board. Published by the Woodcraft League of America, New York, N. Y.

U. S. Natl. Museum. U. S. National Museum, Washington, D. C.
